

Jonathan Johnson

I'm a cybersecurity architect and mentor dedicated to helping the community feel secure, informed, and empowered. In my professional life, I focus on designing secure systems that help organizations stay protected in a fast-moving digital world. Over the years, I've led teams to solve complex security challenges, architect resilient systems, and protect critical data across diverse environments.

Alongside my career, I serve as the Director of Technology and Innovation on the Board at United Social Services Inc., a role that allows me to combine my technical skills with my passion for giving back. I'm committed to helping people and communities access the tools and opportunities they need to succeed.

Outside of work, mentorship is something I feel called to do. Whether it's guiding someone who's just starting out in IT or supporting a young person who's figuring out their path, I believe in showing up, sharing what I've learned, and helping others find their voice and their confidence. It's important to me that people know they have someone in their corner who genuinely wants to see them succeed.

Most of all, I'm a husband and a father. Family is at the center of everything I do. My greatest motivation is to create a life and a legacy that my loved ones can be proud of. Whether I'm spending time with my family, teaching my child new things, or planning for

the future, I lead by example and show what it means to care, to work hard, and to keep learning.

I'm driven to empower others, uplift my community, and build something lasting.

Something that makes a difference long after I'm gone. If you'd like to connect, collaborate, or just have a conversation about technology, mentorship, or life, I'd love to hear from you. You can reach me anytime at jonathan@jonathan-johnson.org .
